Registration

The Second Annual

MISSISSIPPI
Headache SYMPOSIUM

Canton, MS
October 18 - 20, 2019

Keynote Speaker

Rigmor Jensen
MD, Dr.Med. Sci.

Professor at the University of Copenhagen
Cofounder of the Danish Headache Center
Speakers

Rigmor Jensen MD, Dr.Med Sci.
University of Copenhagen

*Idiopathic Intracranial Hypertension*

Dr. Jensen is co-founder of the Danish Headache Center, which has twice been awarded the Global Excellence in Health. She has been an associate professor and lecturer at the University of Copenhagen since 1997 and was appointed to professor in Headache and Neurological Pain in 2007. Dr. Jensen has conducted and been involved in numerous epidemiological, clinical, and neurophysiological studies of migraine, tension-type and cluster headache since 1988. She has also published more than 250 scientific papers, referenced in peer-reviewed journals and more than 50 textbooks.

Christina Treppendahl, FNP-BC, AQH, MHD
Symposium Chair, Founder and Director

Ms. Treppendahl is the Founder and Director of the Annual Mississippi Headache Symposium. Profits from the symposium are donated to The Headache Center Institute, a non-profit organization dedicated to practitioner training and provider education to improve outcomes for headache patients. She was chosen as one of 30 world experts in headache medicine to speak at the 2020 World Migraine Summit. Ms. Treppendahl is certified in Headache Medicine by the National Headache Foundation. She is currently enrolled in her second year of the Master of Headache Disorders programme at the University of Copenhagen in Denmark where she studies with her mentors, including our 2019 keynote speaker, Dr. Rigmor Jensen. Ms. Treppendahl has served as the Principal Investigator for over ten clinical trials for headache treatment therapies. She also travels the country presenting accredited CE on new therapeutic options for migraine at regional AANP meetings funded by an unrestricted educational grant.

*Headache 101: Migraine Diagnosis And Treatment 2019 Evidence Based Guidelines*

Frank R. Berenson, MD
PANDA Neurology and Atlanta Headache Specialists

Dr. Berenson has been practicing child neurology for almost 20 years, many of these including the care of neonates. He has been involved in numerous clinical trials and drug studies related to the treatment of headache disorders, epilepsy, Tourette’s Syndrome and ADHD. He serves as an Advisory Board member at PharmaCentra and is a member of several professional organizations, including the American Academy of Neurology, American Academy of Electrophysiologic Medicine, and the American Headache Society.

*PEDIATRIC HEADACHE: Caring for Children with Headache*

Nathan L. Bennett, MD
Preferred Headache Center

Dr. Bennett is one of about 600 Certified Headache Medicine Subspecialists in the country that specializes in the treatment of headache and concussion. As an active member of the American Headache Society, he serves in various roles, including ad hoc Medical Education Committee member. He has participated in various, funded clinical research studies, authored several articles, and lectured on migraine, concussion, other headache disorders.

*Migraine Biology: CGRP Recent Developments and Innovate Treatments*

Anne Calhoun, MD, FAHS
UNC Chapel Hill; Carolina Headache Institute

A founder and partner of the Carolina Headache Institute. Dr. Calhoun holds a subspecialty certification in Headache Medicine through the United Council for Neurologic Subspecialties. She was among the first physicians credentialed as Menopause Clinicians by the North American Menopause Society. Her research and teaching focus on the impact of female sex hormone in the central nervous system with particular interest in menstrual migraine, catamenial epilepsy and sleep disorders in women. She is widely published and a regular commentator for peer-reviewed journals.

*MIGRAINE IN WOMEN: Menstrual Migraine, Stroke Risk, & Treatment during Pregnancy & Lactation*
Randy Evans, MD
Baylor College of Medicine
Dr. Evans is certified in Neurology and Headache Medicine. He is on staff at three hospitals, and as a clinical professor at Baylor, he actively teaches classes to medical students and residents. He has authored several books, more than 220 journal articles, 75 book chapters, and is on the editorial boards of 10 publications. His media appearances include ABC-News, CNN-Headline News, Univision, BBC radio, the New York Times, and The Wall Street Journal. He has been listed in publications including Best Doctors in America and America’s Top Doctors.

Tiffany Harding, CCRC, MSCS
Island Neurological Associates
Ms. Harding is a Certified Clinical Research Coordinator through the Association of Clinical Research Professionals, a Certified Multiple Sclerosis Care Specialist, and a Certified Phlebotomist. She has extensive research experience conducting clinical research in MS, migraine, neuropathic pain, neuromuscular disorders and epilepsy. She is a member of the American Headache Society, National Headache Foundation, and the Clinical Advisory Committee of the Long Island Chapter of the National Multiple Sclerosis Society.

Shivang Joshi, MD
DENT Neurologic Institute
Board-certified in Neurology and Headache Medicine, Dr. Joshi is a recipient of the American Headache Society’s 2012 “Frontiers in Headache Research” Scholarship Award for Cluster Headache Research. His clinical interests include the trigeminal autonomic cephalalgias, such as cluster headache and migraine with aura in women. He also completed a fellowship in Headache Medicine at the John R. Graham Headache Center and was an Instructor of Neuroscience at the Harvard Medical School.

Jennifer McVige, MD, MA
DENT Neurologic Institute
Dr. McVige is board certified Pediatric Neurology, Adult and Pediatric Headache, and Neuroimaging. She is the Director of the Concussion Center as DENT Neurologic Institute and provides care for many active and retired professional and semi-professional athletes with traumatic brain injuries. She also works with many local schools to care for injured students. She attended the State University of New York for medical school and her Masters degree in Behavioral Neuroscience and Psychology.

Christopher Gottschalk, MD, FAHS
Yale Medicine
As Director of Yale’s Headache and Facial Pain program and Chief of General Neurology, Dr. Gottschalk oversees the training of medical students and residents in both Neurology and Primary Care, as well as the fellows in both Headache and Pain Management. His primary interest is in education regarding the facts of headache disorders and the fictions that interfere with their recognition and treatment. He is also active in curriculum development at the American Headache Society.

Ashley Hattle
Author, Freelance Journalist
Ms. Hattle is the author of Cluster Headaches: A Guide to Surviving One of the Most Painful Conditions Known to Man, which she wrote after suffering episodic cluster headaches for 11 years and struggling to find the correct diagnosis and treatment. Hattle is working to create a series titled “Patient View Books” to help those who suffer from other brain disorders and mental illnesses understand their treatment options. She is also a professional photographer.

Brigitte Lovell, DMD
Keeler Center for Headache and Orofacial Pain
Dr. Lovell is a dentist specializing in headache, orofacial pain management, and dental sleep medicine. Her focus is on treating and managing all aspects of chronic refractory headache disorders such as migraine, tension-type headache, cluster headache, post-traumatic headache, and occipital neuralgia. She also treats patients with orofacial pain conditions, including musculoskeletal pain, atypical tooth pain, trigeminal neuralgia, and neurovascular and neuropathic pain. She is experienced in Botox injections for chronic migraine, intra-articular injections, trigger-point injections, and nerve blocks in the head.

Chad Stephens, DO
Noble Pain Management & Sports Medicine
Dr. Stephens specializes in pain management and sports medicine. He is nationally recognized for his expertise in work with concussion and migraine management. He helps his patients by determining the true source of their pain and creates personalized treatment plans for each of them, so they may return to their normal, active lives. Dr. Stephens believes in the power of cutting-edge technology, science and medicine and is an early adopter of innovative and life-changing procedures. SphenoCath (a minimally invasive solution for migraine sufferers) and TenJet (a minimally-invasive procedure for tendon pain and injuries) are two of his advanced treatment options.

Ira M. Turner, MD
Island Neurological Associates
Dr. Turner is a founding partner of Island Neurological Associates and started its Center for Headache Care and Research. His research has included clinical trials for chronic and episodic migraine and treatment trials for cluster headaches and post-herpetic neuralgia. Over the years, he has published multiple articles and case reports on headache-related topics in peer-reviewed journals. Dr. Turner has spoken at CME conferences on headache with sex and exertion, as well as other type of headache with long duration. He has also served as mentor, consultant, advisor, board member and speaker for many different groups and organizations.

What To Do When Your Usual Acute Migraine Therapy Doesn’t Work
Registration

Registration for regional providers is $100—only 100 seats available:

Optional Add-Ons

+$100 includes presentation slide packet
+$200 includes access to videos of presentations and presentation slide packet
+$250 includes Neuroanatomy course with Peter McAllister and Sherrie Downie
+$250 includes Neuroimaging course (in the GTI simulation lab)

$800 for full package

Up to 20 hours of accredited CME for all sessions and workshops.

Up to 20 hours of accredited CME with the optional neuroimaging and neuroanatomy workshops

Neuroanatomy Presenters

Sherry Downie, Ph.D
The Arthur S. Abramson Department of Physical Medicine and Rehabilitation
Dr. Downie has been an educator specializing in human gross anatomy, medical microscopic anatomy, kinesiology and biomechanics for more than 20 years. She has developed 3-D, hands-on and online teaching tools that help students visualize and experience the core principles of kinesiology and human movement. She has authored the Online Dissector used in the dissection lab by Einstein's medical students and co-authored papers on human anatomical variation, anatomy of clinical procedures and medical education.

Neuroanatomy Workshop

Neuroimaging Presenters

Heather O’Hara McCoy, DNP, AQH
Integrative Headache Care & The Headache Center Institute
Dr. McCoy has led teams in planning and developing innovative programs and care units, including the Novalis Stereotactic Radiosurgery Program and the Neuroscience Intensive Care Unit at Scottsdale Healthcare. In 2016, she earned a Certificate of Added Qualification in Headache Medicine from the National Headache Foundation and holds many additional certifications. She has provided both published articles and spoken presentations for a variety of professional organizations, including The American Association of Neuroscience Nurses.

Neuromodulation: Non-Invasive Stimulators for Headache Treatment

Ian Carroll, MD
Stanford University Medical Center
Dr. Carroll is board-certified in four specialties, including Headache Medicine, Addiction Medicine, Pain Medicine, and Anesthesiology. His primary focus is on chronic daily headache, chronic migraine, occipital neuralgia, and new daily persistent headache, specifically related to cerebrospinal fluid leaks and nerve injuries. He was instrumental in creating Stanford’s CSF leak program and its Peripheral Nerve Injury Pain Program. He also runs Stanford’s Morbidity and Mortality conference, helps select and train anesthesia residents, and has published over 30 articles.

MYSTERY HEADACHE: CSF Leaks & Low Pressure Headache
Update on Imaging in CSF Leaks
